Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 4-7 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ophardt et al in view of Lewis et al.

Ophardt et al show a rigid container 60, pump 10, housing 70 and lever 88. Ophardt et al lack a venting means. Lewis et al show a venting means 130 so as not to draw a vacuum within a container (column 9, lines 15-16). It would have been obvious to one of ordinary skill in the art to have modified the Ophardt et al container with a venting means as taught by Lewis et al so as not to draw a vacuum within the container.

Claims 3 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ophardt et al in view of Lewis et al as applied to claim 1 above, and further in view of Salvail.

The Ophardt et al/Lewis et al apparatus lacks the venting means a snorkel. Salvail shows a dispenser having a snorkel 8 venting means to vent the container. It would have been obvious to one of ordinary skill in the art to have modified the Ophardt et al/Lewis apparatus with a snorkel venting means as taught by Salvail as an alternative equivalent means for venting a container.
